Introduction

We at Blockrock would like to make our contribution to the promotion of the international investment culture. Due to the difficulties of the last years (covid, riots, wars, rising prices, inflation and financial crises) it has become difficult for most people to invest their money profitably.

In times where a few large and institutional investors control and steer the financial markets, we want to bring the power and influence back to the general public. For this reason, everyone at Blockrock is a CEO and can decide on everything project-related and shape it according to their wishes.

With an organized community and the resulting mass intelligence, we can increase the influence and also generate more profits than individuals.

Our System

Transaction fees

Discussions

Researches

Votings

Profits

Buybacks & Burns

Our System

Transaction Fees

The transaction fees will be collected in the investment wallets weekly. The addresses of the wallets are public.

Researches

All submitted proposals from the "Investors Room" will be discussed, evaluated, reviewed and approved from the "Portfolio Managers" group. After that, a certain number of investment opportunities are released for voting.

Discussions

New projects and investment opportunities will be searched, proposed and discussed in the Investors Room group (e.g. Shares, cryptocurrency, yield farming). After that, the community has one week to discuss about the individual proposals. If a proposal receives positive feedback from the community, the proposal is submitted to the Portfolio Management Group.

Votings

The community decides weekly by majority vote in which projects the collected transaction fees should be invested (initially by telegram later with the Blockrock app).

Our System

Profits

Blockrock is a long-term investor and invests with an eye to the future. Profits will be realized in the next bull run. Profit taking is also determined by the community.

Buybacks & Burns

All investment earnings are used for buybacks and burns or for reinvestments. The community also decides on this by majority vote. Through the buybacks and burns, we achieve a price increase from which everyone benefits equally.

Communities

News Channel

All important information is shared in the blockrock news group. This group is public.

Investors Room

Access to this group is granted to those who hold at least $250 in BRO$ tokens. In this group, members can present their investment proposals to the community. The community can discuss and vote on the proposals in this group. Admission only with proof of BRO$ token purchase and invitation from the BlockRock team.

Access is voluntary and the required number of BRO$ tokens can be changed by the community.

Portfolio Manager

Access to this group is granted to those who hold at least $3000 in BRO$ tokens. In this group, all proposals from the "Investors Room" are processed, evaluated and approved for voting.

Access is voluntary and the required number of BRO$ tokens can be changed by the community.

Name: BlockRock
Symbol: BRO$
Total Supply: 1 000 000 000
Decimals: 18

Transaction Fees

Buy Tax 6 Percent

With every purchase, 6 percent of the purchase amount automatically goes into the community wallets

Development

45/ of the transaction fees are used for additional liquidity on the trading platforms, for marketing campaigns and for the team or for the team expansion.

Sell Tax 9 Percent

With every sale, 9 percent of the purchase amount automatically goes into the community wallets

Investments

55/ of the transaction fees are made available for the community to invest.

Roadmap/ Visions

The roadmap is flexible and will be further developed by the community. Blockrock adapts to the wishes and ideas of the community. Therefore, many new plans can be added or canceled again.

Here are some goals of the community:

$250,000 Community Crypto Portfolio ◉

Official Company ◉

Investments in the real economy ◉

Revenues in the real economy ◉

Blockrock cafes in germany, austria, switzerland ◉

Launch of the Blockrock blockchain ◉

GainSpot

GainSpot is another project of the BlockRock community. GainSpot runs exactly like BlockRock with the small difference that it invests more in risky assets and presales. This project is managed with the same care and brings BlockRock further incomes for buybacks and burns.
