Introduction

Redefining Success Together.

Maximum transparency, fully community-driven and focus on the public good. BlockRock is a unique crypto community project aimed at reducing the power of large investors in the markets and distributing the resulting profits to the broader population. To achieve this, BlockRock is fully managed and controlled by the investors themselves, with all decisions made collectively and democratically.

With an organized community and the resulting mass intelligence, we can increase the influence and also generate more profits than individuals.

Our System

Our System

Transaction Fees

The transaction fees will be collected in the investment wallets weekly. The addresses of the wallets are public.

Discussions

New projects and investment opportunities will be searched, proposed and discussed in the Investors Room group (e.g. Shares, cryptocurrency, yield farming). After that, the community has one week to discuss about the individual proposals. If a proposal receives positive feedback from the community, the proposal is submitted to the Portfolio Management Group.

Researches

All submitted proposals from the "Investors Room" will be discussed, evaluated, reviewed and approved from the "Portfolio Managers" group. After that, a certain number of investment opportunities are released for voting.

Votings

The community decides weekly by majority vote in which projects the collected transaction fees should be invested. We have our own DApp for our votes. Here you can participate anonymously in our votes. votings.blockrocktoken.com

Our System

Profits

Blockrock is a long-term investor and invests with an eye to the future. Profits will be realized in the next bull run. Profit taking is also determined by the community. In addition to investments, we also generate profits through marketing and many other businesses.

Buybacks & Burns

All earnings are used for buybacks and burns or for reinvestments. The community also decides on this by majority vote. Through the buybacks and burns, we achieve a price increase from which everyone benefits equally.

Communities

News Channel

All important information is shared in the blockrock news group. This group is public.

In this group, members can submit investment proposals, discuss future investments with the community and vote anonymously on investments.

t.me/BlockRockNews

GainSpot

All important information is shared in the GainSpot news group. This group is public.

In this group, members can submit investment proposals, discuss future investments with the community and vote anonymously on investments.

t.me/GainSpot

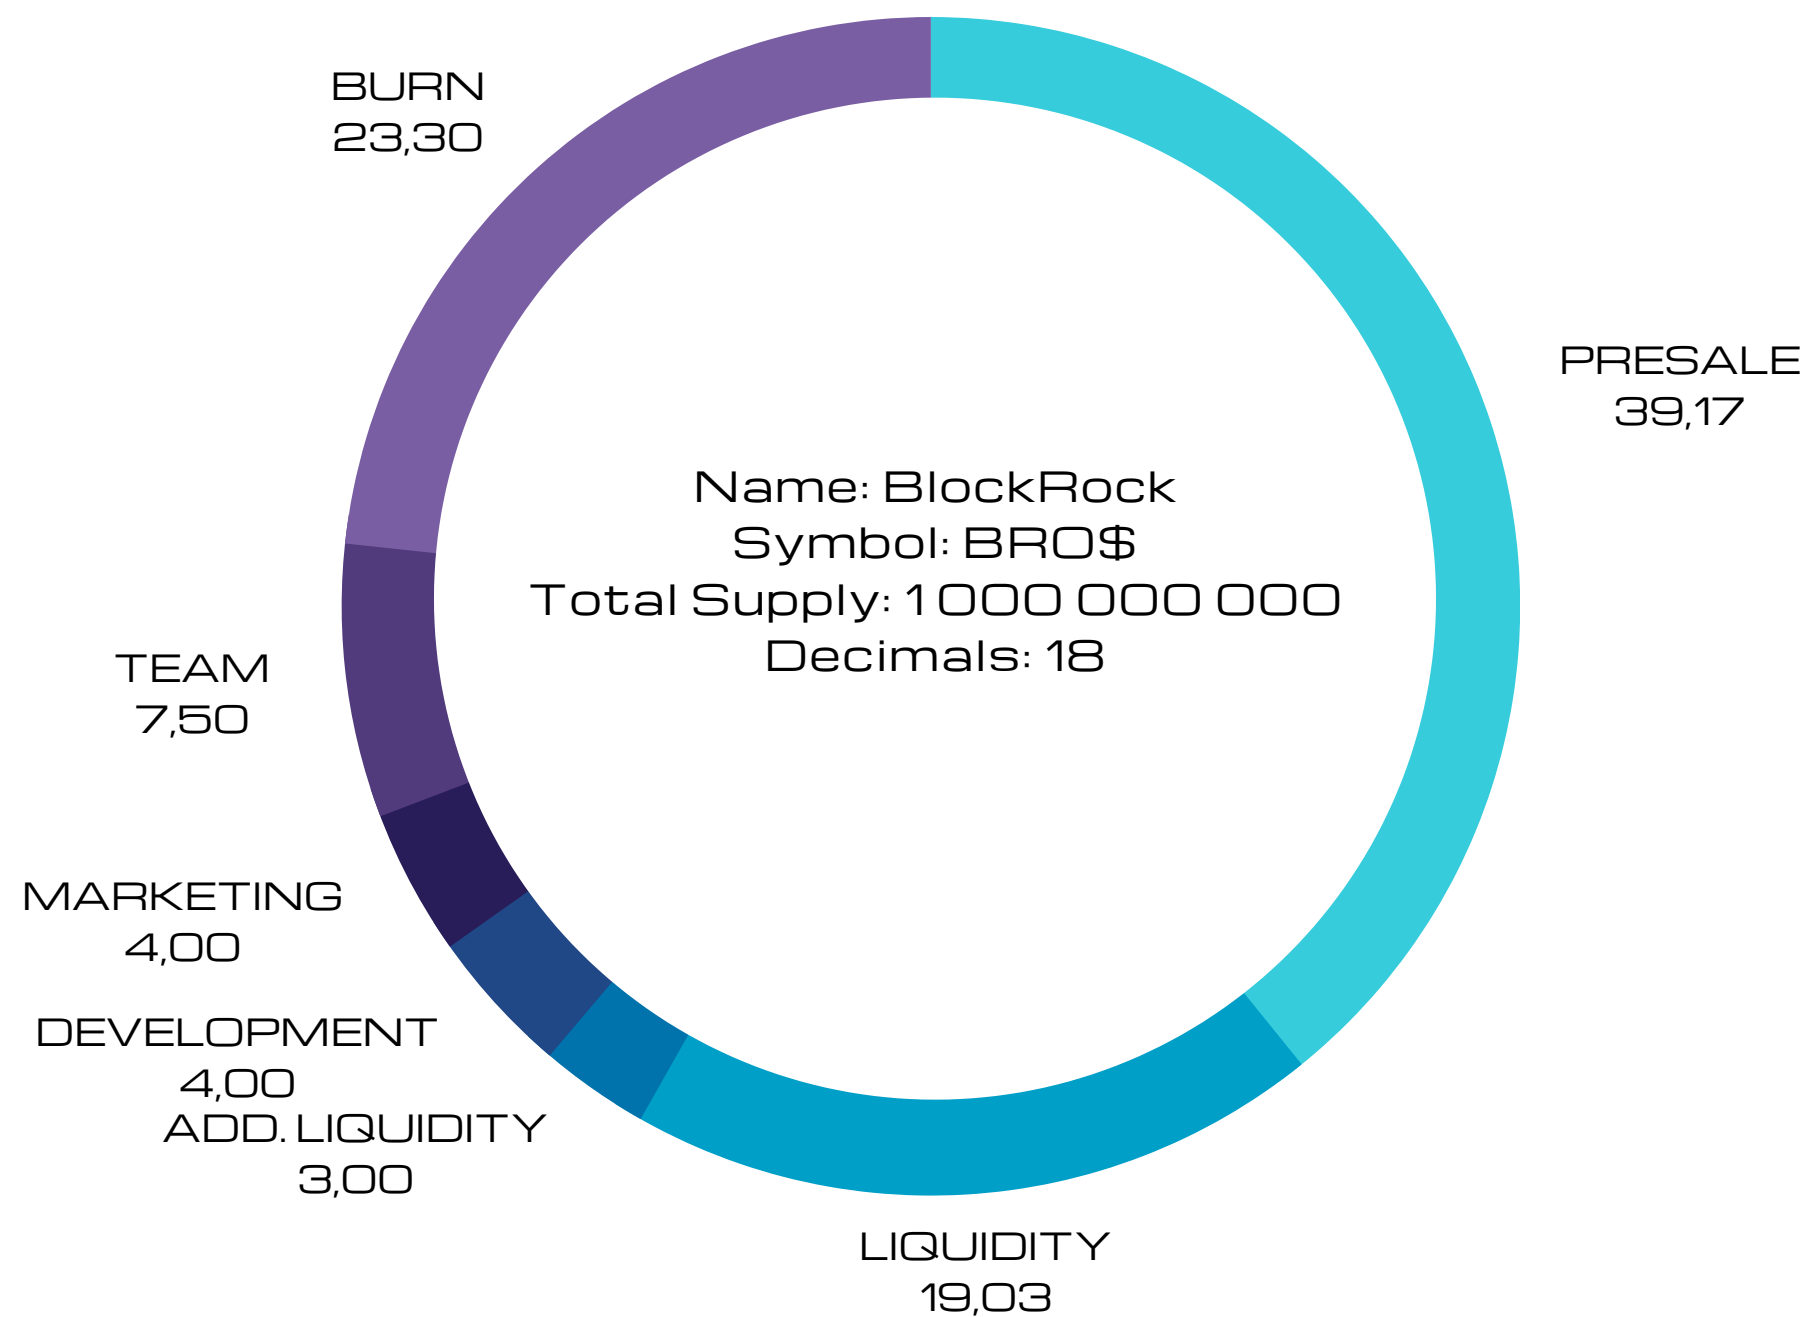

Discord

On our Discord server you will also find all important information and news about BlockRock and GainSpot.

discord.com/invite/ysUVTfBY8

Tokenomics

Transaction Fees

Buy Tax 8 Percent

With every purchase, 8 percent of the purchase amount automatically goes into the community wallets

Sell Tax 10 Percent

With every sale, 10 percent of the purchase amount automatically goes into the community wallets

Development

The half of the transaction fees are used for additional liquidity on the trading platforms, for marketing campaigns, for employees and the sales department..

Investments

The half of the transaction fees are made available for the community to invest.

Roadmap/ Visions

The roadmap is flexible and will be further developed by the community. Blockrock adapts to the wishes and ideas of the community. Therefore, many new plans can be added or canceled again.

The latest status can be found at www.blockrocktoken.com
